We'd love to help you create your own garden with the best planting options for your location and your lifestyle. So first we need to ask you some questions.

Where do you live?

What type of house do you have? (weatherboard cottage, double brick, federation, modern).

What is your style?(for example retro, Scandi, minimalist, maximalist).

What kind of garden do you like/want (cottage, formal, coastal, Mediterranean, kitchen).

What are the dimensions of the area? (square metres).

What is the orientation of your garden? (does the garden you want to create face north, south, east or west?).

Please provide details of any existing features in your yard that may impact the garden (eg deck, BBQ area, children's play equipment).

How much time per week are you willing to spend maintaining your garden? (for example weeding, mulching, pruning).

Are you concerned about water use and, if so, how often are you happy to water?

Please send us some photos and/or a video of the area where you want to plant.

Cost of a plan and maintenance schedule will depend on the size of your garden and your requirements.
